# **NEXYA COMMERCIAL CASSETTE** [0S5+IS5]

# False ceiling-mounted inverter mono-split air conditioners ducted for large rooms

#### **HIGH EFFICIENCY**

High-performance R32 refrigerant gas with maximum technological efficiency, to reach the energy class A++.

# **DECORATIVE PANEL**

Equipped with a digital display, it has vents for the ejection of air even at the corners. For greater climate comfort.

### **COMPACT DESIGN**

Reduced dimensions up to 650x650, in the compact version.

# INDEPENDENT BLADE CONTROL

Independent flap control for greater climate comfort, in sizes from 24 up to 48.

# **FEATURES**

#### Two models

Compact cassettes (with slimline width and length dimensions of only 647x647 mm) and cassettes (with width and length dimensions of more than 600x600 mm and slimline height from 205 mm).

#### Fresh air inlet

The internal units of the commercial line are fitted with specific air inlets to introduce fresh or outdoor air into the product.

# **Condensaton lift pump**

The internal units are fitted with a condensation pump.

# Remote ON-OFF

All units in the commercial line are fitted with terminals to control the remote switching on and off of the unit via an external device.

# **Contact alarm**

The units in the commercial line have a contact that allows the alarm status of the product to be synchronised with an external device.

# **Hydrophilic Aluminium coating**

Suitable for installation in coastal or particularly humid areas, thanks to its excellent anti-corrosion properties. With equivalent environmental conditions, the new coating of the condensers guarantees them a longevity exceeding 7 times that of the traditional models.

# **FUNCTIONS**

- · Cooling, heating, dehumidification and ventilation
- Auto, Co, Sleep, Silent and Turbo functions
- 24h timer: for scheduling switch on and off.
- Follow Me function: precise temperature detection at the remote control location.
- $\textbf{Gearfunction:} \ 3 \ power options \ (50-75-100\%) \ to \ optimise \ energy \ consumption.$
- Anti dust filter: to capture dust and pollen.
- Self-Clean function: automatically cleans and dries the evaporator eliminating dust, mould and grease to ensure clean air in the room.

The declared data relate to the conditions provided for in EN 14511, EN 14825 and EU Delegated Regulation 626/2011. The actual power consumption of the product, in conditions of real use, may differ from what is indicated. The data are subject to change and modification without prior notice. Dehumidification values refer to DB 27°C WB 19°C conditions.

The sound pressure values are at the following conditions: in semi-anechoic chamber, unit positioned in a free space, measuring device positioned 1.4 metres below the internal unit.

The sound pressure values of the outdoor units are at the following conditions: in a semi-anechoic chamber, unit positioned in free space, measuring device positioned at a distance of 1 metre (outdoor unit).

\*Non-hermetically sealed equipment containing fluorinated gases with GWP equivalent of 675.

Energy efficiency classes refer to a range between A+++ and D.
